WEEKLY BAZOO.

SEDALIA, MO.

TUESDAY, MAY 1, 1883.

MISSISSIPPI AND THE HORROR
OF ITS HURRICANE.

The stories told of the tornado's work in Mississippi are simply frightful. Something came out of the sky one night, something unknown to a great multitude of the people there, and when the morning came the dead were everywhere. Desolation and destruction were everywhere.

What was this unknown thing? Nobody knows. Science stands dumb in its presence as though stricken itself by this monster. It has as many transformations and transfigurations as a world might have in its passage from chaos to fruits, and fields, and swelling uplands, and winding rivers. Some see it as a huge, oncoming, livid mass, eruptive like a volcano, and swift like a pigeon's flight. Some see it like one tremendous funnel, the mouth in the sky and the spout on the earth. Some only hear in it one mighty roar, oncoming, overwhelming, and indescribable. Some see hear nothing at all except that there is the blackness of darkness everywhere, a terror that can be felt in the air, a horrible smell of sulphur, a deluge of mud, ooze, debris, hail, rain, and pieces of ice; and then an awakening to a whole town crushed, or a whole stretch of country or territory mowed over as clear as stalwart mowers might mow a level meadow.

Mississippi has suffered much in many ways, but in no way like this. The waves of civil war have swept over it, but what of that? Only men fight, and only men fall. Great floods have inundated its lowlands, and rose against and wasted the accumulation of years; but what of that? To lose property in manifold shapes is the common lot of all. Energy and capacity can rebuild and improve again. Pestilence has stricken it here and there with an invisible hand, none the less deadly because it was thrust out all unseen from the river mists, and from the swamps where the poisonous exhalations are; but yellow fever has had medical science and skill to fight it step by step and finally drive it back, a wasted specter, to its jungles.

But where is the help, or guard, or succor against this other thing which is variously named—the hurricane, the cyclone, the tornado? There appears to be none. Nothing is exempt. It is impossible to read the details of the late series of these mysterious hurricanes which have just struck Mississippi in various sections without dwelling upon the appalling nature of the work done. Mothers in travail, infants at the breast, the aged of either sex, strong men, young girls and boys, whole families—age, every human thing on a plantation, every animal, sometimes every fowl, and often every house, or barn, or shelter of any kind, have been literally swept from the earth. Already the list of the casualties discovered presents this ghastly and terrible array: Men, women and children killed—one hundred and fifty-eight; men, women and children wounded, more or less severely, five hundred and nine. In battle, no matter how fierce, the average proposition of the killed to wounded is only one out of every five. Here it is worse; it is more than war.

What is to be done? Nothing that can be told by any man to-day. Should one of those unknown monsters ever make its appearance in Sedalia, the boldest, the bravest, or the strongest in our midst would be just as powerless to avert calamity to himself or those about him as the

tenderest infant in its mother's arms. When God speaks as from Sinai, what is man?

THE LAST OF MRS. LANGTRY.

Having finished her professional tour of the great cities of the United States, Mrs. Langtry has got back to her starting point, New York. Her visit has had its sweets and its bitter-nesses. On the one hand a great deal of delightful flattery and compliment have been showered upon her; on the other, her artistic pretensions have been the subject more of merriment than of serious consideration, while malicious and very correct persons have made many unpleasant reflections on certain peculiarities of her personal conduct. The mean result is probably satisfactory. She has gained the highest ambition of a woman; to be universally envied by her own sex and universally admired by the opposite one. If she is sensitive to criticism, there is even a healing balm to her wounded feelings; she has made a great financial success of her visit.

Her final appearance, or what a critic calls her re-entrance, in New York is made the occasion of renewed criticism of her art by supposed dramatic experts. As when she first appeared on the American stage, there is a prevailing curiosity concerning her. This curiosity takes, however, a slightly different form. Its object is to ascertain whether her American engagement has been improving to her as an artist. The critics are really interested in her, and loth to dismiss her without, if possible, giving her a character. Their curiosity, interest, and good feeling seem to be well placed. They profess to find great improvement.

It would be real disappointment to the country if Mr. William Winter, the professional dramatic critic, of the New York Tribune, neglected to say an revoir to Mrs. Langtry as only he can. All the world knows that, besides Mr. Gebhardt, there are two great and devoted admirers of Mrs. Langtry. One of these is Mr. Oscar Wilde. The other is Mr. William Winter. Mr. Wilde admires her because there is something Greek in the cast of her features and the mould of her form. Mr. Winter worships her because she is ethereally beautiful and radiant, or, as he expresses it, "made for the companionship of the roseate gods of mirth." Unfortunately for the general enlightenment, Mr. Wilde has contented himself with one or two enthusiastic effusions, for he is a poet, and poets admire in silent contemplation. Mr. Winter, however, being a critic, whose business it is to give expression to sentiments, as well as to entertain them, is more diffuse. He has written of Mrs. Langtry in sentence, paragraph, column, and leaded and unleaded articles. On the present occasion he has been good enough to give us a very remarkable bit of criticism. It should be read by all who wish to know how wonderfully Mrs. Langtry's genius has grown within her in a few months.

The play was Pygmalion and Galatea. Mrs. Langtry personated Galatea. Mr. Winter "occupied an aisle seat," accompanied by a distinguished personage, who was often very enthusiastic in his applause. This is important information. Mr. Winter was certainly at the play. He saw it and criticised from knowledge. Thus an illusion, which has existed in several quarters, that Mr. Winter is like a great many dramatic critics who write commendatory articles without seeing the performances, is happily dispelled.

Mr. Winter finds a number of points of improvement in Mrs. Langtry. Improvement No. 1, is she has "greater mental repose at a high pitch of excitement," improvement No. 2: she can "measurably conceal" self-consciousness. Improvement No. 3, her attitudes, movements, gestures, and elocution, which we remember he formerly regarded as perfect, are now the cream of perfection. Improvement No. 4: Her execution of the part is "clearly seen to be intelligent in purpose, and, as to the lighter elements of the character, its ingenuousness, its unconscious playfulness, its mystified perplexity, and its pretty and childlike dependence—entirely adequate and charming."

The general judgment of Mr. Winter is that henceforth Mrs. Langtry is not to be regarded as a pretty woman but as an actress whose merits are to be determined by her "professional achievements." This declaration Mr. Winter shows the critic who has to do with the actress' art and not her personal beauty. But he can not entirely divest himself of feelings which naturally arise in the contemplation of so much loveliness. For in another place he speaks in glowing terms of her "apocryphal figure," which was "impressively displayed," and bore its antique drapery with "authentic dignity."

THE COMPLETION OF THE
NORTHERN PACIFIC.

It is now certain that the Northern Pacific railroad will be completed within three months. It is probable, however, that several months will elapse before traffic over it is regularly begun, for so large a piece of work must require some perfecting before everything can go forward harmoniously. It is expected that all will be in readiness by the middle of September, in time for shipments of grain for the fall markets.

The importance of this event can not easily be estimated. It is a historical occurrence to be remembered in one national history with the opening of the Central Pacific road and the laying of the Atlantic cable.

In the first place it will result in the building up of a great civilization in Dakota, Wyoming, and the country along the Pacific coast north of California. These are now isolated districts, which, however, have many well settled sections and a number of considerable towns with interests of established and branching importance. All that they require is means of communication with the outside world, and this once given them will beyond doubt have a transforming effect. The great belt of rich land extending far to the north and south along the eastern course of the road is probably the finest wheat country in the world. A large part of it lies in the United States; the remainder stretches east and west throughout the extent of British Columbia; all sections are easily accessible, and although the Canadian Pacific road will divert a great deal of the northern grain traffic, the great bulk of trade will fall to the share of the American road.

There is not a part of the country through which the Northern Pacific road runs which is not surpassingly rich. In Wyoming and the Rocky Mountain regions the mining interest is of vast importance. In Washington Territory and the neighboring regions the lumbering interest is a source of great profit. In addition to all this the manufacturing arts will no doubt flourish throughout the country penetrated by the road, for the facilities for manufacture are everywhere naturally great. Thus the Northern Pacific everywhere reaches important interests. In this it has a commanding advantage over the Central Pacific, which runs for hundreds of miles through barren regions, almost uninhabited, and certainly forever unprofitable.

If the country traversed by the Northern Pacific road is on the whole so much better than that through which the Central Pacific runs, how much greater must the civilizing influence of the one be than the other? When we remember what a marvelous effect the Central road has had on the whole Western country, parts of which are very remote from it, we can have no doubt that the great fertile regions of the Northwest, with which the Northern Pacific will have direct communication, have a most glorious future in store. Dakota is destined to be as populous and to have as intelligent and active a civilization as Illinois or Ohio. Wyoming will also become a great State, and Washington Territory and Oregon will rival California.

There is one other great result which will follow the completion of the Northern Pacific road. A stimulating influence will be reflected upon the growth of our already great Northwestern cities. St. Paul and

Minneapolis will receive the grain, minerals, and lumber of the richly productive West. Most of these will be transmitted to Chicago, which will therefore be immediately benefited, and become beyond all dispute the largest grain markets of the world.

THAT HACKING COUGH can be so quickly cured by Shiloh's Cure. We guarantee it. For sale by Bard & Miller.

ABOUT APPLETON.

News, Notes and Nuggets
 Picked Up for the "Paper"
 Published for the People
 Now on Earth."

A Novel Butcher—He Wanted to
"Chaw Up" the "Bazoo's"
Correspondent.

APPLETON CITY, April 28.
 Some time ago there appeared in the Bazoo an article headed "Appleton by Gaslight" in which a certain butcher, whose name was not given at the time, but who sails under the illustrious title of Fred Fabrice, was shown up (only partially, however), in an unenviable light, as having been leading improper relations with a female of easy virtue. The article caused considerable excitement and was discussed extensively among our citizens, as it was pretty generally known that the butcher was making himself ridiculous with his actions, and the Bazoo correspondent was congratulated upon several occasions for the step he took to remind the "old sinner" of his folly.

Of course it rans the old man's ire, and he was loud in his threats, and offered large sums to know who was the author of the article. Now, we have never concealed the fact that we occasionally dropped the "great religious daily" a line, but somehow the butcher never found it out until last Tuesday, when he immediately filled his tank with "club-house-kill-me-quick" and saluted forth to pulverize your correspondent. He found us—broken we are still alive and have no bones broken, and don't have the least desire to die with our boots on.

It is generally understood that the Bazoo editor furnishes a metallic basket and a brass band at the funeral of all its correspondents that get "tore up" by men who have their character "splashed" through its columns, and there may yet be a chance for a picnic in Appleton.

A NEW MILL.

A long needed want is about to be supplied in our city. A gentleman of means has decided to erect a \$20,000 mill in Appleton, and work will be commenced upon it in a very short time. It is useless to say this will be a paying enterprise. There is on an average one hundred thousand pounds of flour shipped into this market monthly. Then why not build a mill? Heretofore our merchants have had to compete in prices with our neighbor towns who have a mill. Hence, after paying the high rate of freight, it left them a very small profit for handling it. The machinery in this mill will cost about \$14,000.

SOME MORE SCANDAL.

Some weeks ago a woman of probably 35 or 40 years of age, a widow, applied at the Prier house in this city, for a situation as a domestic. She was given a place and at once entered upon her duties. A few days ago the landlady's suspicions were aroused to the effect that her new help was not in a fit condition to attend to the duties, and questioned her in regard to the matter, but was assured that her suspicions were without foundation, as she (the domestic) was subject to attacks of dropsy and that was the cause of her unnatural appearance.

Last Thursday morning she gave birth to a child in the water closet of the hotel. It is the only case on record of such a result from dropsy. "Father," could probably cite to instances of greater breaks in nature, but it gets away with the captain and the doctor. Mother and child doing well—"father" not heard from. The woman is the mother of seven children, and has been a widow about two years, and has been acting in the capacity of housekeeper for a widower, who lives in the vicinity of Monroe, for the past year.

SHYSTERING.

The correspondent of the Osceola Sun, from this place, in the last issue of that paper "beats the devil around the bush" over our shoulders. When he makes the assertion that he attended the festivities at Nevada, he simply lies, and Mr. Sun correspondent, if you haven't said enough to show up anything that is of any importance, drop the quill. A man that is not man enough to father his own production, even if it is deformed and a failure, has not grit enough to "write for the papers."

A Disastrous Fire.

Wheeling, W. Va., April 28.—A special from Wellsburg, West Virginia, says a fire broke out at 4 o'clock this morning in Fowler's livery stable, and burned with surprising rapidity north and south, destroying half a square. The entire central portion of town was only saved by the heroic work of the citizens and a light rain that started after the fire had been raging an hour. Loss \$20,000; insurance \$10,000.

Gold Mine Discovered.

Washington, April 28.—Agent McGillicuddy, of Penn Ridge Indian agency, Dak., under date of April 19th, writes to the commissioner of Indian affairs as follows: "Red Cloud wishes to inform his great father that his heart is good, and his mind tranquil, and also that he has discovered a gold mine on his reservation, and that he intends to go to mining with his people as soon as the weather becomes fine. He does not wish to be disturbed in possession of said mine for ten years."

Baised a Draft.

Halifax, April 28.—On the arrival of the steamer Parian, a Norwegian named Israeliehi, of Hottingsdale, was arrested, charged with raising a draft for three hundred crowns. The sum of \$1,331 was found on him.

RICH HILL RICHNESS

In Which a Little Mirth will
be Found by all who
Read ItA General Resume of the Doings
of the Pittsburg of
Missouri.

Rich Hill, Mo., April 27, 1883.

—Some of the "boys" are talking of Sundaying in Butler next Sunday. Attractions are there for some of them.

—Judge Worlan has added another boom to the list of Rich Hill enterprises, by establishing a broom factory, located on Cedar street.

—Baumert & Foster, oil prospectors, have established their lives in Rich Hill, and are prospecting for oil, near the western limits of the city.

—Advance brigade No. 3 of Cole's circus was in the city to-day, consisting of E. H. Madigan, F. W. Lamm, J. Theis, Zerk Coop, Wm Russell and E. Davidson.

—An order has been issued by the council for all dogs to be muzzed, from May 16 to April 10. All unmuzzed canines after the 20th will be shot according to law.

—Lambert & Richardson's dramatic company will be at the opera house this evening and to-morrow evening. "The Banker's Daughter" will be rendered this evening.

—The quarterly report of the postoffice of Rich Hill, for the quarter ending March 31, 1883, Geo. P. Huckleby, postmaster, is as follows: Total receipts \$14,250.00; expense of office, \$444.00; net receipts, \$981.00.

—The brick building of J. M. Wise & Co., on Walnut street, is progressing right along, and will probably be completed by the last of next week. Someone here borrowed a large amount of money of him which he could never recover.

—Freight will be unloaded at the Maple street Gulf depot next week. The tracks will be completed this week, and the removal of the old depot will be commenced on Monday or Tuesday. Everything will be completed by the last of next week.

—It is said that Col. Wheeler, ex-secretary of the coal company, now in jail at Butler awaiting trial for forgery and obtaining money under false pretenses, will establish his defense on the grounds of insanity. He has commenced his little part in the drama by acting insane.

—A grain and stock exchange has been established here by J. K. Sidens and J. C. Woodworth, of Nevada under the firm name of Sidens & Co. This is quite an item among the business enterprises of the city, and it will certainly receive all the encouragement that the merits of such enterprises naturally deserve.

—A woman by the name of Craig, who lives in this city, and is insane, produced quite a little sensation on Park avenue, yesterday. In some way she managed to leave the house, and coming down town she took charge of a team and wagon and was about driving off when discovered. When questioned she said she was going back to her people. She was taken charge of by Marshal Logson and confined in the calaboose until her friends, who were notified, came to take care of her.

THE ODD FELLOWS' ANNIVERSARY CELEBRATION.

The celebration of the Odd Fellows, was well attended and was quite an enjoyable affair and a success in every way. The order was represented

FROM BUTLER.

by H. C. Mills, G. C. Wood, J. G. Walker, Jno. Van Camp, Geo. Smith, J. C. Veingham, A. C. Wilson and lady, W. Barker, Geo. Ferris, J. W. Gibson and lady, K. A. Hun, W. S. Rose, W. B. Bridgeford and lady, S. L. Bragg, G. M. Riley, G. M. Riskey, C. B. McFarland, G. W. Todd, E. E. Swift, A. Sims, W. W. Eldridge and lady, and the Butler cornet band, consisting of S. W. Peach, W. H. Hupp, J. E. Sprague, W. S. Cassidy, S. P. Day, T. B. McFarland, F. M. Eldridge, A. M. Hunter and Chas. M. Johnson.

FROM SCHILL CITY.

by E. Rhoads, W. T. Maning, J. R. Cunningham, Chas. W. Gardner, F. O. Collins, A. F. Cobb, John A. Gooch, B. J. V.ingham, John Shepherd and W. H. Willerson; also, J. E. Hennin, of Nevada; H. G. Gates, of Ft. Scott; A. B. Walker, of Walker Station; L. Harris and A. M. Spoor, of Carthage; H. T. Hart and A. Holden, of Rockville. Other members of the order from other points were in attendance, whose names we could not learn.

The programme of the day, as carried out, was as follows:

At 10 o'clock a. m. the order convened at the hall and held a secret session until 12 m., when they adjourned for dinner. At 1:30 p. m. they convened at the hall and formed for grand parade. Headed by the Butler cornet band they marched south to Park avenue, thence west to Fifth, south to Walnut, west to First, south to Park avenue, east to Third, south to Maple, east to Eighth, north to Park avenue, west to the opera house. At about 2:30 p. m. the opera house was crowded with celebrators and spectators, who, for an hour listened to an able address delivered by M. S. Dowden of Kansas City, on the merits and worth of Odd Fellowship. At the close of the lecture the crowd was dismissed until 7:45 p. m., when they again convened at the opera hall to listen to the Rev. Mr. Hackney, of Rich Hill, who, for an hour and a quarter held his audience as if by magic, delivering a most excellent and interesting discourse on Odd Fellowship. The celebration was a success, and Rich Hill Lodge was well accredited.

BRIEF INDIVIDUALITIES.

—Ed Vance is in the city this week.
 —Charley Beasley returned to the city to-day.
 —Miss Lillie Croff left this week, on a visit to Illinois.
 —R. J. Hunley, of Butler, came down to the city Friday.
 —Ben Shoemaker, of Pleasanton, Kansas, is visiting in the city.
 —Hon. Levi Moler, of Papinville, was in the city the first of the week.
 —Geo. Holt left Friday for New Tacoma, Washington Territory.
 —A. R. Wesson, of Appleton City, was in the city one day last week.

—Geo. F. Coates, of St. Louis, was in the city to-day, at the Arcade.

—H. G. Gates, of Fort Scott, attended the celebration yesterday.

—J. W. Fleanor returned Friday from his visit to Mulberry, this county.

—Judge Pace, of Butler, was in the "Future Great" one day this week.

—Mrs. Frank Eldridge, of Butler, is visiting her parents, in this city, this week.

—L. Bartle, has moved his paint shop to Walnut between Fifth and Sixth streets.

—E. A. Denton, attorney at law, left Thursday for Eureka, Kansas, on legal business.

—S. B. Jones went to Archie, this afternoon to attend a call meeting of the Archie Coal Mining Co.

—F. J. Tygard, of Butler, was in the city Tuesday, attending the meeting of the Rich Hill bank.

—P. J. Forre, of Shelbyville, Kentucky, was in the city this week, visiting his friend T. Hiner Crockett.

—Misses Annie Wyatt, Jessie Pyle, Maggie Mills and Ida Wood, of Butler, were in the city Thursday.

—J. N. Ashby, late tinner at J. L. Minon's hardware store 1st Sunday evening for Gainesville, Texas.

—Frank Templeton, of Bracerville, Ohio, is in the city visiting his brother, George Templeton, of this city.

—Charley Helms went to Clinton Wednesday in the interest of the real estate firm of Payne & Helms.

—A. B. Walker, of Walker station, Vernon county, was in the city yesterday attending the Odd Fellows celebration.

—Tom Nichols, yardmaster at Ovid has brought his family from Carthage, and will henceforth be a resident of the city.

—Mr. Rader, of St. Louis, is in the city superintending the management and construction of the Rich Hill water works.

—Henry Kaute and W. P. Dean, of Butler, were registered at the Chicago yesterday, being in the city on business.

—H. Loeb, of the firm of Loeb & Bros. left Tuesday, on a tour to Europe, where he will visit his parents at Rheinpfalz, Germany.

—There is a movement on foot to build an arbor with seats, at the medicated spring in Southeast Sedalia, an improvement long needed by the visiting public. All the citizens of this city should help a little in this work, as its waters are free, and every one visiting this spring is more or less fatigued, especially the ladies, who claim for it much merit in female diseases.

Cuticura

THE GREAT SKIN CURE

THE CUTICURA TREATMENT, for the cure of 1. Skin, Scalp and Blood Diseases, consists in the internal use of CUTICURA RESOLVENT, the new blood purifier, and the external use of CUTICURA and CUTICURA SOAP, the great skin cures.

WILL McDONALD, 2542 Dearborn St., Chicago, gratefully acknowledges a cure of Salt Rheum on head, neck, face, arms, and legs for seventeen years; not able to walk except on hands and knees for one year; not able to help himself for eight years; tried hundreds of remedies; doctors pronounced him hopeless; permanently cured by CUTICURA RESOLVENT (blood purifier) internally, and CUTICURA and CUTICURA SOAP (the great skin cures) externally.

FOR RHEUMATISM. H. E. Carpenter, Esq., Henderson, N. Y., cured of Rheumatism or Dropsy of two years' standing by the CUTICURA RESOLVENT (blood purifier) internally, and CUTICURA and CUTICURA SOAP (the great skin cures) externally. The most wonderful case on record. Care certified to before a justice of the peace and prominent citizens. All afflicted with itching and scaly diseases should send to us for this testimonial in full.

SKIN DISEASE. F. H. Drake, Esq., Detroit, Mich., suffered beyond all description from a skin disease which appeared on his hands, head, and face, and nearly destroyed his eyes. The most careful doctoring failed to help him, and after all had failed, he used the CUTICURA RESOLVENT (blood purifier) internally, CUTICURA and CUTICURA SOAP (the great skin cures) externally, and was cured, and has remained perfectly well to this day.

SKIN HUMORS. Mrs. S. E. Whipple, Decatur, Mich., writes that her face, head, and some parts of her body were almost raw. Head covered with scales and sores; suffered fearfully and tried everything. Permanently cured by CUTICURA RESOLVENT (blood purifier) internally, and CUTICURA and CUTICURA SOAP (the great skin cures) externally.

Cuticura Remedies are for sale by all druggists. Price of CUTICURA, small boxes, 50¢; large boxes, \$1. CUTICURA RESOLVENT, \$1 per bottle. CUTICURA SOAP, 25¢. CUTICURA SHAVING SOAP, 15¢.

Potter Drug and Chemical Co., Boston.

BEAUTY For Rough, Chapped or Greasy Skin, Blackheads, Pimples, Skin Rash, and Infantile Humors, use CUTICURA SOAP, an exquisite Scented Toilet Soap, and Cuticura Cream, and Cuticura Lotion, and Cuticura Shaving Soap, and Cuticura Shaving Cream.

COMPLETE TREATMENT \$1.

A single dose of Samuel's Radical Cure instantly relieves the most violent Sneezing or Head Colds, clears the Head as by magic, stops watery discharges from the Nose, prevents ringing Noises in the head, cures Nervous Headache, and subdues Chills and Fever. In Chronic Catarrh it cleanses the nasal passages of foul mucus, restores the sense of smell, taste and hearing when affected from the head, throat, and bronchial tubes of offensive matter, sweetens and purifies the breath, stops the cough and arrests the progress of Catarrh towards consumption.

One bottle Radical Cure, one box Catarrhal Solvent and Sanford's Inhaler, all in one package, of all druggists, for \$1. Ask for Sanford's RADICAL CURE. POTTER DRUG AND CHEM. CO., BOSTON.

For the relief and prevention. The instant it is applied Catarrh, Rheumatism, Neuralgia, Sciatica, Coughs, Colds, Weak Back, Stomach and Bowels, Shooting Pains, Numbness, Hysteria, Female Pains, Pimples, Itch, Eruptions, Liver Complaints, Bilious Fever, Malaria and Epidemics, use COLLINS' PLASTER (an Electric Battery) and laugh at pain. 25¢. every where.
